OBJECTIVE

Dedicated Software Developer with over 1 year of experience seeking a growth-oriented position. I aim to leverage my technical expertise in Java and JavaScript, along with my innovative thinking and logical skills, to contribute effectively to organizational success.

EXPERIENCE

Jr. Software Developer — Pinnacle Teleservices Pvt. Ltd Dec 2024 - Present

- Designed and implemented a secure end-to-end microservices SMS gateway using Spring Boot REST APIs, supporting RSA-256 JWT authentication and encrypted payload handling.
- Built an API-gateway layer featuring API-key provisioning, strict rate limiting, and a JTI blacklist stored in Redis to effectively revoke sessions.
- Developed a multithreaded record-fetch engine using Spring WebClient, increasing throughput for bulk jobs by concurrently retrieving SMS data and auto-creating per-member tables.
- Optimized data handling: implemented streaming to temporary files for large multi-recipient batches and single-row database operations for small requests, reducing memory consumption.
- Created a Dockerized Spring Boot pipeline to programmatically provision Loki datasources and Grafana dashboards via API, reducing setup time by 20%.
- Integrated Ola Maps SDK for real-time routing and geocoding, utilizing geospatial indexing for low-latency results.

Web Development Intern — BITLANCE TECH HUB PVT LTD July 2020 - Oct 2020

- Developed the I-Educate project, an educational platform providing web development tutorials and practical tools for learners.

Salesforce CRM Intern — IT NETWORKZ PVT. LTD April 2022 - June 2022

- Managed customer data and gained hands-on experience with the Salesforce ecosystem, including Dashboards, Lightning View, and Salesforce Org.

TECHNICAL SKILLS

Programming Languages	C, C++, Java, JavaScript
Web Technologies	HTML, React, Node.js, Express.js
Databases	MongoDB, SQL Server (SSMS), Oracle, MySQL
Tools & OS	Docker, Redis, XAMPP, AWS (S3), Git, Windows, Linux
Certifications	HackerRank C (Problem Solving), Java, SQL Server

EDUCATION

B.Tech in Computer Science and Engineering 2021 - 2024
Kavikulguru Institute of Technology and Science (RTMNU) **Aggregate: 83.40%**

Higher Secondary Certificate (H.S.C) 2017 - 2018
Maharashtra State Board **Percentage: 49.08%**

Secondary School Certificate (S.S.C) 2015 - 2016
Maharashtra State Board **Percentage: 60.60%**

LIVE PROJECT

Jewellery Tag Generation & Rate Display Dashboard

Oct 2025

Link: jewelley-rate-display-dasboard.vercel.app

- Engineered a ZXing-powered microservice to generate secure QR tags with embedded lookup URLs, enabling scalable tag creation and high-speed product retrieval.
- Developed a fault-tolerant Spring Batch job with Apache POI to parse and validate Excel data, implementing batched JDBC writes for restartable, auditable imports.
- Built a secure, scalable direct-to-S3 upload pipeline using Spring Boot and AWS SDK v2, utilizing presigned URLs and server-side validation for reliable asynchronous processing.

AI-Powered Calendar Meeting Scheduler

2025

- Developed an agent-based scheduling system using Python and Flask to automate end-to-end meeting coordination.
- Designed a modular multi-agent architecture with a Planner Agent for input validation and an Executor Agent for workflow orchestration.
- Integrated Google Calendar API to automatically create events and generate meeting links via Google Meet.
- Implemented a conflict detection mechanism to identify overlapping schedules and suggest optimal alternative time slots.
- Built an SMTP-based email notification system to send structured meeting invitations to all participants.
- Developed a centralized logging framework to track system actions, errors, and execution flow for monitoring and debugging.

ACADEMIC PROJECT

Image Caption Generator Using Deep Learning

- Developed a system combining Computer Vision and Natural Language Processing (NLP) to generate descriptive text captions for images.
- Utilized Python, Machine Learning, and Vision Transformers (ViT) to achieve high-accuracy results.

ACHIEVEMENTS & ACTIVITIES

- Achieved 2nd Rank in the 7th Semester of the B.Tech program.
- Earned HackerRank 3-Star badges in SQL and C Programming.
- Served as Secretary and Social Media Coordinator at the Innovation Incubation Center.
